Dr. Bobby Junker - ONR

FORCEnet CAPABILITY

FORCEnet is not a thing, but a capability.

The extent to which that capability is realized depends entirely on the technology available at any given time and the policies in place at any given time.

FORCEnet - The Vision

A construct that integrates sensors, networks, decision aids, weapons and supporting systems into a highly adaptive human-centric comprehensive maritime system that operates from the sea bed to space and from sea to land.

Naval Transformation Components
