

Amendment 0009  
Solicitation Number ONRBAA 12-019  
“Research and Development/Technology Maturation of Solid State High Power Laser Weapon Systems,  
Subsystems, and/or Components for Surface Navy, USN”  
Date 15 October 2012

The purpose of Amendment 0009 is to respond to questions submitted from 10/04/2012 through 10/15/2012.

1. Industry Questions and Answers are provided as follows:

**(Q101) Will ONR accept the classified addendum separate from the unclassified proposal?**

(A101) Yes, ONR can accept the classified addendum separate so long as it is received by ONR before the BAA 12-019 deadline - 2:00pm Eastern on 10/16/2012.

**(Q102) BAA specifies Firm Fixed Price for Phase 1 submittal. Would ONR accept an OTA (Other Transaction Agreement ) contracting approach?**

(A102) No, as BAA 12-019 states, the plan is to award the Base period as a Firm Fixed Price contract.

**(Q103) A question has come up regarding the customer deliverable items for a component level proposal. The question is whether or not ONR requires material traceability for the hardware we anticipate delivering?**

(A103) ONR desires to maintain material traceability for any parts in component, subsystem or system level proposals. However, the method of tracking may vary widely by proposal and will be so weighted in the evaluation process under "Ability to Meet Technical Requirements", however the intent is enable the identification of logistical issues, including but not limited to spares, long lead items, and military critical technology listed parts or items which will be used in the development of both prototype technical data packages (TDP) as well as any component or subsystem TDPs.
