

ONR BAA 07-023
Amendment #3

**Mine Countermeasures (MCM) Systems for Littoral Combat Ship Advanced Flight
Mission Package Questions**

1. I am working on a system to communicate with dolphins. Would any of your grant opportunities be available for this work. **ONR only anticipates awarding contracts.**
2. Is this Broad Agency Announcement a follow-on to a previous BAA or other requirement? **No.**
3. Where is the place of delivery/performance? **Primary place of performance is contractor site.**
4. (For white papers), Is ONR requesting a detailed cost estimate (per task per year) that includes Job Categories, LOE, rates, description of ODCs, basis for estimates, etc. for each task in the cost estimate, rather than a simple "Price per Task per Year"? **No. ONR is requesting some information on the cost of each task, but not "proposal" detail; just enough about the task breakout/cost to make an intelligent decision. Provided should be more than a ROM, but less than billing rates for all the personnel involved.**
5. Is the Navy looking for solutions that apply to the airborne only (AMCM) portion of the MIW Mission Package? Or, is the Navy interested in solutions that address both the airborne (AMCM) and underwater (RMS, US3 and BPAUV, i.e., acoustic) portions in a combined manner? My concern is the apparent emphasis on the word "flight" in the phrase, "... Advanced Flight Mission Package" ; I do not want to propose solutions that are out of the scope of your program. **No, under this announcement, the Navy is looking for solutions that apply to all 3 areas: airborne, surface, and underwater.**
