

Amendment 0002

Special Notice N0001415RSN11 titled “Automation for UxV-based Mine Countermeasures”

Question and Answer:

- 1. Can you clarify the award information in Section V? For example, if we propose to 3 Topics in Product Area 1, does that mean there is a \$3M limit to the funding request?***

The award amounts will vary according to the level of effort required to accomplish the proposed tasks. The award information provided in Section V is nominal and is intended to serve as a general guide for proposal conceptualization. These dollar amounts do not represent a predetermined upper or lower bound on award sizes. Proposals addressing multiple tasks should include a funding request that is proportional to the effort required.
