Welcome to the

Defense Technical Reports Automated Information List (TRAIL)

[Subscribe](#)[Update Subscription](#)[DTIC](#)[DISA](#)

TRAIL is a free electronic mailing list that automatically disseminates citations to DTIC's unclassified/unlimited technical reports recently added to the DTIC technical reports database. Our technical reports are categorized according to [DTIC's 25 subject categories](#) and 251 groups and subgroups which are described more fully in the [Subject Categorization Guide for Defense Science and Technology](#).

TRAIL subscribers may choose to receive their first bibliography via email immediately after subscribing; TRAIL listings will follow every two weeks. The bibliography is based on the categories and subgroups chosen on the subscription form.

FIELDS GROUPS COMPUTER PROGRAMMING AND SOFTWARE; CYBERNETICS

CORPORATE AUTHOR ARMY RESEARCH LAB ADELPHI MD

TITLE Small Robot Team System Design

DESCRIPTIVE NOTE Final rept. Feb 2000-Mar 2003

PERSONAL AUTHORS Young, Stuart H.; Nguyen, Hung M.

REPORT DATE OCT 2003

PAGINATION 24 PAGES

REPORT NUMBER ARL-TR-3107

MONITOR ACRONYM XA

MONITOR SERIES ARL/ADELPHI SUPPLEMENTARYNOTE: The original document contains color images.

DESCRIPTORS *SOFTWARE ENGINEERING, *ROBOTICS, GLOBAL, ARMY RESEARCH, THREATS, ARMY PERSONNEL, WEAPON SYSTEMS, TEAMS(PERSONNEL).

IDENTIFIERS OFW(OBJECTIVE FORCE WARRIOR), FCS(FUTURE COMBAT SYSTEM), PE62705A

ABSTRACT The transformation of the U,S Army toward an objective force that is more lethal, survivable, sustainable, and responsive to worldwide threats will include robotic systems. The Future Combat System (FCS) and Objective Force Warrior (OFW) are two critical initiatives leading toward the Objective Force that will include robotic systems. The U.S. Army Chief of Staff General Shinseki stresses that soldiers will "remain the centerpiece of our formations" and will be the "heart" of the Objective Force. The U.S. Army Research Laboratory (ARL) is developing technology that supports the FCS and the soldier-centric OFW initiatives. For OFW 2010, there is an immediate need for a robotic follower within the next 2-3 years. OFW focuses on extending small team capabilities without overburdening the warrior (this will include robotic systems). This report will discuss some of the work that ARL is doing with the Land Warrior (LW) program and the OFW Program.

The Defense Technical Information Center (DTIC) Scientific and Technical Information Network (STINET) Service helps the DoD community access pertinent scientific and technical information to meet mission needs more effectively.

Private STINET consists of the following:

- DTIC's Technical Reports collection. A database of approximately 2 million bibliographic citations of reports describing the progress or results of research efforts and other scientific and technical information held by DTIC
- All recently added unclassified, unlimited and unclassified, limited full Technical Reports
- Active and inactive Research Summaries (RS) from 1965 to present
- Independent Research & Development data
- Gray literature information
- A language translator
- The British Library's **inside web**
- Canada Institute for Scientific and Technical Information's *CISTI*

DTIC provides valuable online technical information support to small high-technology firms, as potential R&D contractors and SBIR/STTR participants, to enhance their research and development, technology transfer, networking and marketing efforts.

Call 1-800-363-7247 or e-mail (SBIR@dtic.mil) to find out about additional tech transfer opportunities and comprehensive technical information support to small, technology companies.

Objectives

1. Enhance the performance of small firms as federal contractors and potential contractors by providing maximum access to defense-related technical information.
2. Facilitate commercialization of federally-funded research and development.

Basic DTIC SBIR/STTR services described below are free. Optional services can be charged to a major credit card or deposit account. Call for details.

[STINET](#)

• Direct online access to the comprehensive Defense technical database. Do keyword searches for documents in the extensive DTIC holdings.
