

Information for the NR&DE Community

TechSolutions is now powered by [Confluence](#) for enterprise wiki capability and [Jira](#) for proposal submissions, tracking and workflow. While we require that fleet members register for an account at <https://reg.fusion.navy.mil> as a member of **Naval Research & Development Establishment (NR&DE)** you likely already have an account. Each SYSCOM has their own instance of the **Fusion Collaboration Suite (FCS)** which includes Confluence/Jira/Fusion/Chat, along with their own registration system. Accounts in these instances are automatically synchronized to TechSolutions every 30 minutes.

To determine if you have an account synchronized to TechSolutions, you may try to access the following link to the TechSolutions Wiki <https://techsolutions.navy.mil/wiki/> which is restricted to .mil networks and a valid Common Access Card (CAC). This community space contains additional program information, past projects, and other resources.

Registration by SYSCOM:

- **NAVWAR (NIWC PAC/LANT, PEOs)** - no registration needed, all employees are automatically provisioned accounts linked to LDAP.
- **NAVSEA** - NAVSEA has over 40,000 registered users on their instance, with registration available at <https://reg.navsea.navy.mil/>.
- **NAVAIR** - NAVAIR has over 20,000 registered users on their instance, with registration available at <https://reg.navair1.navy.mil/>.
- **NRE (ONR, ONR Global, NRL)** - Registration is available at <https://reg.nre.navy.mil/>.
- **MCSC** - Registration is available at <https://reg.mcsc.usmc.mil/>.
- **NAVSUP** - Registration is available at <https://reg.navsup.navy.mil/>.

If you experience any issues, or have additional questions, please call **(703) 696-0616** or email ONR_TechSolutions@navy.mil to let us know.
