

Broad Agency Announcement 12-005 Amendment Number 0002 Image Optimization for Small Focal Plane Arrays

The purpose of Amendment Number 0002 is to amend Section II, Paragraph 1, entitled "Amount and Period of Performance".

II. AWARD INFORMATION

1. Amount and Period of Performance –

"The amount and period of performance of each selected proposal may vary depending on the research area and the technical approach to be pursued by the selected offeror.

ONR plans to issue multiple awards (probably 2 – 3 awards) that represent the best value to the Government in accordance with the evaluation criteria stated in Section V. entitled "Evaluation Information". Offerors have the opportunity to be creative in the selection of the technical and management processes and approaches to address the areas of interest described above. The period of performance of the awards will range from twelve (12) to thirty six (36) months with an estimated start date of 03 January 2013, subject to the date of final award and availability of new fiscal year funds. A budget of \$1.7M is estimated for this program (\$500K/FY2013, \$600K/**FY2014**, and \$600K/FY2015). ONR plans to fund individual awards of \$250,000.00 to \$600,000.00 per year using D&I (Budget Category 6.2) funds. However, lower and higher cost efforts will be considered. Some portion of this budget may fund research requests in this program area received from Government entities outside of this BAA. ONR has funded related technology development under numerous programs. If Offerors are enhancing work

performed under other ONR or DoD projects, they must clearly identify the point of departure and what existing work will be brought forward and what new work will be performed under this BAA.

The award(s) will be made for the full performance period requested. Options will not be utilized."
